

# **International Brain Research Organization School (IBRO)**

**21<sup>st</sup> October - 4<sup>th</sup> November 2018**

**Department of Physiology, AIIMS, New Delhi**

(Registration will open from May 2018)

Department of Physiology, All India Institute of Medical Sciences, New Delhi, is organizing a 15 day IBRO School on “Neural plasticity in health and diseases” from 21st October - 4th November 2018 for the Asia Pacific Region (APRC).

The aim of the school is to introduce to the young investigators the fundamental concepts of neural plasticity and its underlying mechanisms as well as the role of environmental enrichment or deficit in modulating the plasticity of brain. In addition, the workshop would also emphasize that impaired neuroplasticity is the basis of many neurological and developmental disorders. The participants' will be provided knowledge of the principles and hands on training experience of conventional and novel, invasive and non-invasive techniques that can be used to study the plasticity of the brain.

The selection for the school will be highly competitive and applicants interested to participate must apply through IBRO website (<http://ibro.info/events/>). Registrations will commence from May, 2018.
