

**MEASURES TO CURB CORRUPT PRACTICES REGARDING BLOOD  
DONATION IN MAIN BLOOD BANK AIIMS**

1. No donors are accepted as replacement donor for a patient if not carrying valid ID proof of himself/herself and proper donor slip from the doctor.
2. All donors will be asked for photograph and biometric capture before registration.
3. All documentation is computerised for fast and easy recovery of data.
4. Donors have to fill a detailed donor questionnaire with option of self deferral.
5. Pre donation counselling is done by NACO trained counsellors. High risk behaviour is tactically elucidated by the counsellor. Donors with high risk behaviour are discouraged/ deferred from donation.
6. All donors undergo complete physical and systemic examination by doctors before donation. Only if found fit they will be allowed to donate.
7. Any donor found to be suspicious is interrogated to find the truth and if found to be a paid donor is handed over to the hospital security with complete documentation.
8. Continuous monitoring with help of CCTV is done.
9. Security guard is on duty during donation hours. He helps in reducing crowding.
10. Notice, warning patients to not enter into any financial transaction for blood/ components are displayed at strategic places in and around main blood bank premises.
11. MSSO and CMO are always available to help patients in need of blood.
12. Blood bank staff is trained regarding D&C Act rules and are taught to be vigilant at all times as the blood bank runs 24x7.
