

All-India Institute of Medical Sciences
Ansari Nagar, New Delhi-29
(RESEARCH SECTION)

Ref. No. 36/Prop./Biotechnology/RKS/18-19/RS

Dated: 24.01.2019

**Subject: Purchase of CO2 Incubator with accessories for the Deptt. of Biotechnology,
AIIMS, New Delhi-29 on proprietary basis- Inviting comments thereon.**

The request has been received from Dr.Rupesh Kr.Srivastava, Assistant Professor, Deptt. of Biotechnology,AIIMS to purchase the subject item from **M/sEmpirical Scientific, Authorized distributors (Authorized Dealer M/s.SciMed(Asia) Ptd Ltd.) (Mfg.M/s.PHC Corporation).** on proprietary basis. The proposal submitted by **M/sEmpirical Scientific** and Performa Invoice and Departmental PAC certifications are attached.

The above documents are being uploaded for open information to submit objections, comments, if any, from any manufacturer regarding proprietary nature of the equipment/item within issue of 15 days giving reference **No. 36/Prop./Biotechnology/RKS/18-19/RS**. The comments should be received by office of Stores Officer (RS), Research Section at AIIMS on or before **08/02/2019 upto 12:00 p.m.**, failing which it will be presumed that any other vendor is having no comment to offer and case will be decided on merits.

STORES OFFICER (RS)

Encl: Related documents enclosed.

1. PAC Certificate enclosed.

2. Performa Invoice

RESEARCH SECTION

1. Item/Type/Model No. required alongwith specification.
2. Is the item a spare parts attachment or accessory for an existing equipment.
3. Name of the manufacturers/supplier of the item proposed by the Indentor.
4. Are they sole manufacturers/sole distributors of the item.
5. Is there any other item with similar/ equivalent specification available in the market to meet the job requirement envisaged. If the answer is yes, why the same can't be procured. Demanding officer should bring out comparative functional advantages/cost effectiveness of the recommended item from these offered by other.

NO

Yes

No

verification in Catalogs and website of other manufacturers.

Technology is manufactured by single manufacturer

yes, the ratios are reasonable

We have not found any model with same technology and functional features.

SPECIFICATIONS OF CO2 INCUBATOR (WITH ACCESSORIES)

- **CO2 sensor:** Should have a combination of dual **infrared** CO2 sensor and **PID** (Proportional, Integrated and Differential) control with Recovery time ≤ 3 minutes
- **Relative Humidity Control:** Should have gentle air flow through duct, a removable water pan combined with an independent heater, at the base of the incubator for maintaining humidity. Humidifying pan should be easily removable & should have an optical water level sensor to warn of a low water level.
- Should have **option for programmable decontamination with continuous UV sterilization** of air & humidity source (UV lamp should be completely isolated from cell cultures, decontamination method should not trap contaminants inside the incubator or require temporary removal of any components)
- **Walls & shelves:** Should be of copper-stainless steel alloy & should have the ability to kill mycoplasma
- **Interior chamber** should have fully rounded corners
- **Direct Heat & Air jacket system** with three sources of heat – sides, door and independent bottom heaters, all of which should be located outside the chamber
- Should have **Color LCD Touch Panel Display** for full control of different protocols
- Should have standard **USB port** for convenient data transfer for a period of 1.5 months using 2-minute intervals
- Should have **Automatic Electric Door Lock**
- Should have Low profile, **stackable** design
- Should have user friendly door-mounted control panel
- Interior Volume: At least **160 L**
- Temperature Range: **5°C above ambient temperature to +50°C**
- Temperature Uniformity: $\pm 0.25^\circ\text{C}$, Temperature Controllability: $\pm 0.1^\circ\text{C}$
- Chamber humidity: $95 \pm 5\% \text{RH}$
- CO2 range: 0 to 20%, CO2 controllability: $\pm 0.15\%$
- Alarm system: High/low temperature, CO2 level, door & UV lamp failure, independent overheat protection
- Shelves: 4
- Should have field reversible door
- 30mm diameter access ports
- Should have programmable **UV Decontamination System** to prevent contamination without affecting cell cultures in-vitro
- Should also have **High Speed Decontamination System** using vaporized **H2O2** for time saving and documented chamber decontamination

SUB: QUOTATION FOR CO2 INCUBATOR (QTY-1)

Dear Sir/Ma'am,

With reference to your requirement for CO2 Incubator, we are pleased to submit herewith, our offer for the same from PHCbi, Japan formerly Panasonic on behalf of our principals, Scimed (Asia) Pte Ltd

CO2 Incubator Capacity-165L litres(Qty-1)

Make: PHCbi, Japan formerly Panasonic

Model No-MCO-170AICUVH

We understand that creating successful cell cultures requires a CO2 incubator that offers the highest levels of precision, security and ease of use.

Our latest IncuSafe MCO-170AIC CO2 Incubators with innovative technologies offer outstanding quality in performance, maximise cell culture productivity and provide optimum results and reproducibility. The MCO-170AICUVH has a built-in UV lamp and a H2O2 Decontamination board and Electric door lock with password.

Features:

- DHA Direct heat and air jacket system
- Dual IR CO2 sensor
- InCuSafe® copper-enriched stainless steel interior
- Standard Safe-Cell UV® with NEW increased UV lamp life
- Standard electric door lock with password
- Integrated shelf supports
- Full colour LCD touch screen
- USB port
- H2O2 Decontamination board

Benefits:

- Improved insulation performance and lower running costs
- PID Control of CO2 and temperature

- Dual IR CO₂ sensor
- Optimum protection for your cell cultures
- More space for more cultures
- PHCbi's H₂O₂ vapour sterilisation cycle reduces downtime to less than 3 hours for complete, validatable decontamination for increased productivity.

Product Information:

- Active Background Decontamination
- Dual Heat Sterilisation
- Exceptional CO₂ and O₂ recovery times
- InCusaFe Construction for Germicidal Protection
- Zirconia sensor
- Direct Heat and Air Jacket system
- Dual IR Sensor
- H₂O₂ decontamination process
- Patented SafeCell UV lamp

Patented SafeCell UV lamp:

The SafeCell UV lamp in IncuSafe incubators plays a pivotal role in continuous decontamination. The figure below shows the summary of four tests on separate strains of mycoplasma using PHCbi incubators. It can be seen that the lamp in the UV range has a much greater decontamination effect on these bacteria than decontamination lamps emitting at visible wavelengths.

To ensure the elimination of any airborne contaminants that may enter the chamber, the isolated narrow-bandwidth, ozone-free UV light (located at the base of the chamber) automatically switches on for a specified period after each incubator door opening. Water-borne organisms in the humidity water reservoir are eradicated in the same way, ensuring the security of any active cell cultures.

H₂O₂ decontamination process:

The hydrogen peroxide vapour (HPV) decontamination process, used in MCO-230AIC IncuSafe CO₂ Incubator and 170 range of CO₂ and Multigase Incubators, permits quick turn around of the cell culture incubator between processes, even when a complete, validated decontamination is required. Low temperature hydrogen peroxide in biological safety cabinets is a widely used alternative to other decontamination procedures, especially in the pharmaceutical industry.

PHCbi's H₂O₂ system limits incubator downtime to less than three hours for each total chamber decontamination. Despite this increased speed, the high levels of safety needed to meet regulatory requirements are reliably retained. The quick turnaround of this process means that the equipment is out of action for substantially less time than similar direct heat decontamination systems.

The H₂O₂ decontamination process follows several steps. Once the cycle is activated, the door is automatically locked and hydrogen peroxide goes through vaporisation. An airflow system circulates interior air to ensure all surfaces come into contact with the vapour. After this an

ultraviolet (UV) light switches on for 90 minutes, causing the H₂O₂ vapour to decompose into water vapour and oxygen. Once the cycle is complete, the door automatically unlocks. When **hydrogen peroxide decontamination** is employed, all the incubator's interior components, such as shelves, shelf brackets and the humidity tray, are decontaminated in situ. This eliminates the need to remove and replace them for any additional cleaning. In addition, critical parts such as the CO₂ sensor do not need to be removed during the process nor recalibrated afterwards, contributing to the reliable operation of the system. The unique design of PHCbi incubators ensures the use of the decontamination system with no impact on adjacent equipment or the environment.

SPECIFICATIONS:

| | |
|---|---|
| External Dimensions (W x D x H) | 620 x 730 x 905 mm |
| Internal Dimensions (W x D x H) | 490 x 523 x 665 mm |
| Volume | 165 litres |
| Net Weight | 80 kg |
| Temperature Control Range & Fluctuation | AT +5 – +50, ±0.1 °C |
| Temperature Uniformity | ±0.25 °C |
| CO ₂ Control Range & Fluctuation | 0 – 20, ±0.15 % |
| Humidity Level & Fluctuation | 95, ±5 %RH |
| Sterilisation Method | H ₂ O ₂ Decontamination |
| Temperature Sensor | Thermistor |
| CO ₂ Sensor | Dual IR |
| Exterior Material | Painted Steel (rear cover not painted) |
| Interior Material | Stainless Steel Copper-Enriched Alloy |
| Insulation Material | Extruded polystyrene |
| Heating Method | Direct Heat & Air Jacket System |
| Outer Doors | 1 |
| Outer Door Lock | Standard |
| Field Reversible Door | Included |
| Inner Doors | 1 gastight - made of tempered glass |
| Shelf Dimensions (W x D x H) | 470 x 450 x 12 mm |
| Max. Load Per Shelf | 7 kg |
| Max. Shelf Capacity | 10 |
| Access Port | 1 |
| Access Port Position | Rear Upper Left |
| Access Port Diameter | 30 |
| Power Failure | R |
| Out of Temperature Setting | V-B-R |

| | |
|--------------------|-------|
| High Temperature | V-B-R |
| Out of CO2 Setting | V-B-R |
| Door Open | V-B |
| Power Supply | Local |
| Frequency | Local |
| Noise Level | 29 dB |

Optional Accessories:

| | |
|--|--------------|
| Safe Cell UV system | Standard |
| H2O2 Decontamination board | Standard |
| Electric door lock with password | Standard |
| H2O2 vapour generator | MCO-HP-PW |
| H2O2 reagent | MCO-H2O2-PE |
| Double stacking bracket | MCO-170PS-PW |
| Stacking plate | MCO-170SB-PW |
| CO2 gas pressure regulator | MCO-100L-PW |
| Automatic CO2 cylinder changeover system | MCO-21GC-PW |
| Semi-automatic one point gas calibration kit | MCO-SG-PW |
| InCusaFe shelf | MCO-170ST-PW |
| InCusaFe half tray system | MCO-25ST-PW |
| Roller base | MCO-170RB-PW |

Optional Communication System:

| | |
|----------------------------------|--------------|
| Ethernet interface (LAN) | MTR-L03-PW |
| Digital interface (RS232C/RS485) | MTR-480-PW |
| Analogue interface (4-20mA) | MCO-420MA-PW |

Thank You

Proprietary Certificate

PROPRIETARY CERTIFICATE FOR PANASONIC CO2 INCUBATOR, MODEL MCO 170AIC (UVH)

We are please to certify that Panasonic's CO2 Incubator model MCO 170AIC (UVH) is a proprietary product of Panasonic, Japan. We incorporate:

- (a) Proprietary Single beam Infra-Red (IR) Sensor with Dual Wavelength measurement.
This proprietary technology offers unprecedented control accuracy and stability by simultaneously measuring two wavelengths for continuous auto zero calibration. This gives ultra fast recovery without over-shoot and accurate CO2 averages during periods of frequent incubator access with multiple door openings
- (b) Proprietary UV Sterilization to provide continuous contamination control with zero downtime. This proprietary technology decontaminates conditioned air and humidity reservoir to prevent contamination without affecting cell cultures in-vitro
- (c) Proprietary copper enriched stainless steel interior and inventory components that provide natural germicidal protection without rust or corrosion. This proprietary technology eliminates contamination sources and eliminates the effects of airborne contaminants introduced through normal use
- (d) Vaporized H2O2 Decontamination System for high speed and documented chamber decontamination. This proprietary technology gives full decontamination including all in-situ decontamination of all interior components without the need for time consuming removal and autoclaving. There are no high heat emissions, and thereby no need to remove sensors too

Your Sincerely,

Marketing Manager
Asia business Development Group, Marketing Department
Biomedical Division
PHC Corporation

PROPRIETARY ARTICLE JUSTIFICATION

No other make or model is acceptable for the following reasons:-

- (i) Please provide enough description so that it is comprehensible to the lay reader.
- PHCbi MCO-170AICUVH is designed to accommodate a range of diversified experimental requirements, it uses inCu saFe copper-enriched stainless steel alloy interior surfaces to eliminate contamination sources and to mitigate the effect of airborne contaminants introduced through normal use.
 - SafeCell UV includes a programmable ultraviolet lamp, isolated from cell cultures, that decontaminates conditioned air and humidity reservoir water to prevent contamination without affecting cell cultures.
 - The proprietary single beam, dual detector infrared CO₂ system offers unprecedented control accuracy and stability by simultaneously measuring two wavelengths for continuous zero calibration, resulting ultra-fast recovery without overshoot and accurate CO₂ averages during periods of frequent incubator access with multiple door openings.
 - H₂O₂ high-speed decontamination system utilizing vaporized H₂O₂ offers time-saving and documented chamber decontamination with complete safety. Full decontamination process takes less than three hours, saving valuable time.
 - Unlike a high heat decontamination incubator, Panasonic's H₂O₂ decontamination cycle does not emit high heat and resulting in consuming very less energy.
- (ii) What are the unique functional features of the instrument that make the item proprietary.
- H₂O₂ Decontamination System
 - Single beam, dual detector infrared Sensor
 - SafeCell UV Lamp
- (iii) How are they important for scientific work.
- H₂O₂ system limits incubator downtime to less than three hours for each total chamber decontamination. Despite this increased speed, the high levels of safety needed to meet regulatory requirements are reliably retained. The quick turnaround of this process means that the equipment is out of action for substantially less time than similar direct heat decontamination systems.
 - UV Lamp Decontaminates conditioned air and humidity reservoir water to prevent contamination.
 - Mycoplasma stains doesn't grow inside.
- (iv) What steps have been taken to ascertain that these are not available with other manufacturers?
- Proprietary certificate from original manufacturer
 - Verification in catalogs and websites of other manufacturers

Letter of Authorization

To whom it may concern,

This is to certify that SciMed (Asia) Pte Ltd (hereinafter referred to as "SciMed"), with an office at:

196 Pandan Loop #07-11
Pantech Business Hub
Singapore 128384

acts as an authorized distributor of PHCbi brand products, which have the same quality and performances as the ones under Panasonic brand manufactured by Panasonic Healthcare, Co. Ltd., the former company name of PHC Corporation, as listed in Annex A (hereinafter referred to as the "Products"), in the territory of Singapore, Malaysia, India, Bangladesh, Brunei, Cambodia, Myanmar, Nepal, Sri Lanka and Vietnam (hereinafter referred to as the "Territory") for a term of One (1) year from the date of this letter.

SciMed is hereby authorized, on our behalf, to provide purchasers in the Territory with technical and commercial services on all matters concerning the Products based on the effective agreement that SciMed and we have at the time.

In addition, SciMed is also authorized to conduct price negotiation in the Territory to enhance sales performance.

Yours faithfully,

[Handwritten signature]

Letter of Authorization

To,
The Director
All India Institute of Medical Sciences, New Delhi
Ansari Nagar, New Delhi-110029

Subject: Authorization for PHCbi (Ex PANASONIC/SANYO) Biomedical Products

Dear Sir/Madam,

This is as per above subject, We SCIMED (ASIA) PTE LTD, A PHCbi (Ex Panasonic/Sanyo Biomedical) Sales Company for Asia hereby authorize M/s Empirical Scientific, New Delhi having their office as below:

M/s Empirical Scientific,
#203, Mahta Building,
Bhikaji Cama Place,
New Delhi 110066, INDIA

To submit a bid, negotiate supply and service PHCbi Brand products in your institute on our behalf. No company, firm or individual other than M/s Empirical Scientific is authorized to supply PHCbi brand Products in your institute.

Your's faithfully,
For SciMed (Asia) Pte Ltd
