Equipment Name	Hands – Free Ultrasonic Therapy with Pre-Modulated Current
Quantity	1 No.
Guarantee/Warrantee	5 + 5 Years CAMC

Technical Specifications

HANDS – FREE ULTRASONIC THERAPY WITH PRE-MODULATED CURRENT

HF 54 Hands-Free Ultrasound Therapy Unit with Interferential Muscle Stim and Premod Current

The HF54 is the first and only Ultrasound cleared by the FDA for Hands Free Stationary Use

The HF 54 eliminates the two most common application errors associated with a traditional manual ultrasound treatment that have been shown to reduce the therapeutic effectiveness of ultrasound.

These errors are:

Treating for less than 10 minutes.

It is difficult for providers to properly administer manual ultrasound for 10 minutes or more. However, studies show that treatments over 10 minutes are much more effective. With the HF 54 Ultrasound, providers can now administer a safe, low intensity pulsed ultrasound over a larger surface area for a longer amount of time.

Treating too large of a surface area.

Moving a traditional ultrasound over a large area reduces the ultrasound dosage to the targeted injury, which therefore reduces the effectiveness of an ultrasound treatment. At 65cm², the HF 54 sound head is over 6x times the size of a convention transducer! With no need to move the sound head, the HF 54 delivers consistent ultrasound to a larger area.

Our Unique Sound head

The HF 54 produces an even distribution of sound waves throughout its large (3 5/8") sound head of 3 uniform and harmonized crystals. Two channels of interferential and premod current for muscle stim are included with the unit. Premod can be used in combination with ultrasound directly through 1 or 2 sound heads.

The Horizons, a powerful 2" diameter red (660nm) and infrared (880nm) light probe is available as a plug-in with the HF 54 or as a standalone.

Stimulation, both sound heads and Horizon Light Therapy can be used at the same time.

HF54 Hands-Free Ultrasound Standard Features

- HF54 Hands – Free Therapeutic Ultrasound Generator
- Swing-Arm with Sound head
- Combo IFC and Premod Current – through the stimulation pads or the sound head
