April 2014

Dear Valued Customer:

On April 1, 2014, CareFusion announced the completion of its acquisition of the Vital Signs division of GE Healthcare globally.\* CareFusion is a \$3.6 billion global corporation serving the health care industry with products and services that help hospitals measurably improve safety and lower the cost of care. The combination of our companies creates a major player in single-patient-use products for respiratory care and anesthesiology, as well as temperature management and hemodynamic monitoring.

Together, CareFusion and Vital Signs have the R&D, manufacturing and go-to-market resources to drive innovation, invest for growth and better support customers in major global markets. Vital Signs has a history of innovation and expertise in anesthesia, matching CareFusion's history of innovation and expertise in respiratory. The combined organization will have a broad product line, which will include circuits for oxygen and anesthesia deliveries, masks, endotracheal tubes, filters, pressure infusers, temperature management and blood flow monitoring.

GE will continue to support the Vital Signs business during the transitioning phase to CareFusion. Nothing is changing as of today, and we will continue to work together as we have in the past.

- Please continue to place orders through the same route to GE as you currently do.
- You will continue to receive your invoices from GE - same as today.
- You can continue to contact GE customer service for any product inquiries.

When the integration creates a change in the future, we will be sure to communicate to you well in advance to avoid any disruption. If you have any questions, please reach out to your local Vital Signs representative. You can also contact the customer service team (Telephone: 18001027750 Email: [geindiacallcenter@ge.com](mailto:geindiacallcenter@ge.com)) at any time. As always, we appreciate the opportunity to continue to serve you.

Sincerely,

Michael Meyerhoff  
Vice President, Asia Commercial Operations  
CareFusion Asia
