To whom it may concern.

Turnitin® and iThenticate®, including associated components, are single-source products developed and sold by iParadigms, LLC, based in Oakland, CA. Our products are unique services that are not offered by any other vendor or reseller in a similar format. The product may be procured only from iParadigms, LLC, or from our exclusive distributor in Singapore, LibraryForce Limited.

The Turnitin service provides a plagiarism-prevention tool that allows academic institutions to easily determine if students are writing and submitting original work. Utilizing our unique technology, Turnitin searches the Internet, as well as our proprietary databases of papers and digital texts for sources of potential plagiarism. The service then generates a custom originality report that highlights and provides links to any textual matches found on the Internet, in our database of previously submitted papers, and/or in the proprietary databases of subscription-based publication material from content aggregators with whom we have partnered. iThenticate uses the same technology to provide a service to researchers and academics, allowing them to quickly and easily check research work, course notes and other material before publication and release.

To find potential plagiarism, our patented and proprietary technology compares submitted papers to:

- A database of previously submitted student papers — more than 223 million submissions (as of March 2012) (Turnitin only)
- A database of subscription-based electronically published content from a wide range of partners and providers, including:
  - CrossRef provides over 30 million articles and documents from publishers including: Wiley-Blackwell, Elsevier, Association for Computing Machinery, The American Journal of Neuroradiology, American Institute of Physics, International Union of Crystallography, InformaUK, IEEE, Cambridge University Press, European Respiratory Society, British Medical Journal and The New England Medical Journal.
  - **iParadigms is the sole supplier of Originality Checking products to CrossRef and we are the sole receiver of the CrossRef database.**
  - EBSCO, the world's foremost premium research database service provides nearly a million articles from 41,000 titles from more than 300 of their database collections that they sell to libraries, universities, corporations, governments and professionals.
  - One of the most comprehensive periodical databases with over 70 million articles from more than 80,000 titles and backfile coverage from 1980 — from mainstream to specialized sources on virtually every popular, business and professional topic.
  - Emerald, the world's leading publisher of management research
  - Acumen PI coursework.info, the leading provider of high school and college level coursework materials across the disciplines.
  - Sage e-Reference, the publisher of over 60 electronic encyclopedias for the social sciences, public policy, law, business and medicine.
  - ABC-Clio, the publisher of educational and reference materials for history and social studies.
  - A large international textbook publisher, representing thousands of college and secondary textbooks across all disciplines.
- A database of continuously-updated content from the publicly accessible Internet, and
  - An archived copy of past web pages no longer available on the Internet.
- Turnitin and iThenticate generate an Originality Report that includes multiple views and features:
  - Reports are available within minutes after submission (usually much less than two minutes).

Turnitin is a service of iParadigms, LLC  
1111 Broadway, 3<sup>rd</sup> floor • Oakland, CA 94607  
[www.turnitin.com](http://www.turnitin.com) • [sales@turnitin.com](mailto:sales@turnitin.com) • +1 510-764-7600

- Direct-source comparisons of matched words to matched documents (highlighted with or without color coding) numbered and aligned side-by-side.
- Pattern-recognition matching of both word-for-word and paraphrased text.
- Ability to exclude matching material within quotes, within the bibliography, or any individual source.
- Ability to view all underlying matched words that have been obscured by overlapping matches
- Accepted submission formats include: Word®, WordPerfect®, Rich Text Format (RTF), HTML, Text, Postscript and PDF.
- Option to refresh an Originality Report to include matches to any updated content in the database.
- Automatic exclusion of submissions by the same author to the same assignment.

The complete Turnitin solution also includes GradeMark® paperless grading tools and PeerMark® online peer reviewing tools:

- GradeMark is a time-saving alternative to traditional pen and paper grading, making it easy for instructors to give students the valuable, time sensitive feedback that is so essential for building quality writing skills.
- PeerMark online peer reviewing gives instructors the ability to create peer review assignments that students use to evaluate and learn from one another's work.

Turnitin and iThenticate are accessible via a web-based interface and are hosted in iParadigms' secure datacenters.

Turnitin can be integrated with most standard course management or learning management systems such as Blackboard (including former WebCT and ANGEL), Moodle, and Desire2Learn. These integrations make Turnitin seem like a natural extension of the web application an institution already has in place. iThenticate can also be integrated with various research management tools.

Annual subscription fees include unlimited access to free, web-delivered webinars, videos and documentation for educators and students to learn how to use Turnitin. Instructors may attend free, live "how to" training webinars (offered 6 times a week) plus free, live professional development webinars (offered weekly) to assist with curriculum integration issues.

If you need additional information about our services, please contact us at 510-764-7600 or visit our website at <http://www.turnitin.com> [www.turnitin.com](http://www.turnitin.com).

Thank you for your interest in Turnitin.

Sincerely,

James Thorley
