I certify that the item at Sr. No. 1 above is required to be procured on single tender basis as the source is definitely known the specified brand proposed was advantages in meeting our functional requirements.

Specification for automated immunoassay nano-checker analyzer

- It should be able to detect drugs of abuse in urine quantitatively and semi-quantitatively.
- There should be easy and user friendly software to provide convenient and efficient data management.
- It should be capable for quick and accurate results.
- There should be digital imaging system.
- There should be 8-10 inch digital color LCD display with keyboard and touch screen operation.
- There should be data storage of more than 10,000 tests.
- There should be repeatability in results having CV less than 1%.
- There should be real time display to printer or computer.
- There should be USB and internet port in analyzer for connectivity.
- There should be internal and external barcode scanner.
- Approx dimension should be 300mm×240mm×130mm.
- It should be portable in nature with weight less than 1.5 kg.
- There should be multi analysis platform.
- Operating power supply: 220V, single phase, 50Hz AC supply
- It should be able to detect following compounds  
Morphine, buprenorphine, propoxyphene, benzodiazepines, methadone, amphetamine, cocaine, THC(marijuana), barbiturates, phencyclidine, methylenedioxymethamphetamine, tri-cyclic antidepressants,
- 500 Nos. of drug of abuse panel cards for simultaneous detection of morphine, buprenorphine, cannabis, benzodiazepines should be supplied with the analyzer as an accessory.
- Approx cost: INR 4,00,000/-
