

All-India Institute of Medical Sciences **National Cancer Institute** Vill. Badsa, Jhajjar, Haryana-124105

Dated: 25.02.2021

Ref. No.: 03/NCI ST/PAC/2020-21

Subject : Proposal for procurement of "Cytocentrifuge (Thermo Fisher Scientific, Model-Cytospin 4) -01No." for Dept. of Pathoogy on PROPRIETARY BASIS from M/s. Thermo Fisher Scientific through M/s. Vision Diagnostics (India) Pvt. Ltd. and invitation of comments/objections w.r.t. proprietary nature of the equipment if any, thereof.

The National Cancer Institute (NCI-AIIMS), Jhajjar is in the process of procurement of "Cytocentrifuge (Thermo Fisher Scientific, Model-Cytospin 4) – 01No." for Dept. of Pathoogy on PROPRIETARY BASIS from M/s. Thermo Fisher Scientific through M/s. Vision Diagnostics (India) Pvt. Ltd. The proprietary article certificate (PAC) from the Principal M/s Thermo Fisher Scientific as well as from the user department

The above documents are being uploaded for open information to all principal manufacturer or their authorized distributor with the intention to invite objections with regard to proprietary nature of the said

The comments/objections if any, should be received in the office of Stores Officer, Store Section (NCI), Room No. 214, 2nd Floor, OPD Block, National Cancer Institute, Village Badsa, Distt. Jhajjar, Haryana – 124105 on or before 12/03/2021 upto 05.00 PM, failing which it will be presumed that no other bidder/ manufacturer/ vendor is having any comments/objection against the proposition and the case shall be decided purely on merit.

Mr Soutew Cumar

Stores Officer, NCI

Enclosures:

- Proprietary Article Certificate from the Principal M/s. Thermo Fisher Scientific
- Proprietary Article Certificate from User Department duly signed by user faculty & Head of
- OEM Authorization certificate of M/s. Vision Diagnostics India Pvt. Ltd.
- Performa Invoice/Quotation & previous supply order copy for rate reasonability.
- Detailed brochure of the product from the Principal.

Copy to:

User Department (Dept. of Pathology, NCI) – for information only

Certificate of Proprietary for Cytospin 4

To whom it may concern:

Thermo Fisher Scientific (Thermo Shandon Ltd.) is the sole manufacturer of Cytocentrifuge (Model: Cytospin 4) which is having following proprietary feature:

1. Suitable for cell block preparation from cytological specimens by using Thermo Fisher Scientific's proprietary CytoblockTM Cell Block Preparation System (P/N 7401150 and 7401151)

This letter also certify that our anatomical pathology products are sold and serviced in India through Vision Diagnostic India Pvt. Ltd, Ground Floor, Plot No. 405, F.I.E., Opp. Bagga Link Maruti Showroom, Patparganj Industrial Area, East Delhi, Delhi-110092.

Yours sincerely,

Martin Lui

MANUFACTURER'S AUTHORIZATION FORM

To The Chief IRCH, AHMS, Delhi

Subject: Authorization Letter

Dear Sir.

We Thermo Fisher Scientific (Thermo Shandon Ltd.), United Kingdom, who are proven and reputable manufacturers of Cytocentrifuge having factories at Tudor Road, Manor Park, Runcorn, WA7 ITA, UNITED KINGDOM do hereby authorize M/s. Vision Diagnostic India Pvt. Ltd. having address at Ground Floor, Plot No. 405, F.I.E., Opp. Bagga Link Maruti Showroom, Patparganj Industrial Area, East Delhi, Delhi-110092 to submit a tender, process the same further and enter into a contract with you against your requirement as contained in the above referred Tender which are manufactured by us.

We further confirm that no supplier or firm or individual other than M/s. Vision Diagnostic India Pvt. Ltd. having address at Ground Floor. Plot No. 405. F.L.E., Opp. Bagga Link Maruti Showroom. Patparganj Industrial Area, East Delhi. Delhi-110092 is authorized to submit a tender, process the same further and enter into a contract with your against your requirement as contained in the above referred Tender Enquiry documents for the above Equipment/ Stores manufactured by us.

We also hereby confirm that we would be responsible for the satisfactory execution of contract placed on the authorized agent. We also confirm that the rate quoted by our authorized agent shall not exceed the rate which we would have quoted on direct participation.

Yours Faithfully,

Puncet Kumar Verma Sales Head – (India & South Asia)

Thin-layer Cell Preparation System

Thermo Scientific Shandon Cytospin 4 Cytocentrifuge

The ultimate thin-layer cell preparation system.

The Shandon Cytospin has been synonymous with cytocentrifugation for over 40 years. More than 15,000 laboratories worldwide use this simple, reliable instrument. It provides economical thin-layer preparations from any liquid matrix, especially hypocellular fluids such as spinal fluid and urine.

The Shandon Cytospin was the first device to use carefully controlled centrifugation to separate and deposit a thin layer of cells on slides while maintaining cellular integrity. It produces better cell capture and good representation of all cell types present in homogeneous

Features

- · Processes 12 specimens at one time.
- · Accepts all protocols from Shandon Cytospin 1, 2, and 3.
- Redesigned lid-release mechanism allows for onehanded opening and closing of the outer lid for easy access. As an added safety measure, the Shandon Cytospin 4 will only operate when the lid is locked into position. The lid remains locked at all times during rotation. The polycarbonate window allows the operator to see the sealed head during cytocentrifugation.
- Excellent safety design prevents accidental fluid spillage from damaging the mechanical or electronic components and allows for easy disinfecting. It meets stringent IEC 61010 standards for centrifuge safety.
- Pull-out program card allows for up to nine programs to be logged for fast and convenient retrieval (erasable ink pen included).

Safe and Reliable

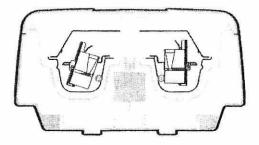

The Shandon Cytospin 4 is designed to protect the operator before, during and after sample preparation. Safety is our top priority. The ability to load the Shandon Cytospin 4 sealed head in a microbiological cabinet is the ultimate safety procedure.

- · Auto-locking, plastic outer lid
- · Autoclavable sealed head
- · Disposable sample chambers with caps
- · Safety alarms that protect users and specimens
- · Wipe-clean control panel

Simple Principle for Excellent Presentation

liquid samples.

Using centrifugal principles, the Shandon Cytospin deposits cells onto a clearly-defined area of a glass slide and allows for the absorption of the residual fluid into the sample chamber's filter card (except Shandon EZ Megafunnel). Cytocentrifugation also constructively flattens cells for excellent nuclear presentation. During operation, the instrument's spinning action tilts the Shandon Cytofunnels® upright and centrifuges cells onto the deposition area of the slide, giving all cell types equal opportunity for presentation. In the Load or Stop position, this unique tilting feature reduces cell loss by preventing residual fluid from coming into contact with the prepared slide.

Simple and Precise Controls

PROGRAM

- Protected program memory stores up to 23 routines for instant recall and protects from power loss.
- Program key pad has "easy-touch" design that allows for easier keystrokes and more intuitive programming.
- Speed window displays the programmed spinning speeds from 200 – 2000 rpm.
- Three acceleration control buttons allow the operator excellent flexibility and exceptional protection for fragile samples.
- Time window displays the programmed and remaining run time from 1– 99 minutes.
- Control feature has a standby power saving mode.
 Displays are also turned on and off by the standby key.
- Specimen safety alarm feature has been added to remind users at one-minute intervals to remove specimens, protect them from "air-drying" and ensure consistent results.
- Safety alarms include an audible alarm that signals
 the operator if the Shandon Cytospin 4 is out of
 balance, outside the speed tolerance, or if the lid is not
 properly locked. As an extra measure of safety for
 the user, the unit will not spin if the lid is not locked.

Shandon Cytospin 4 Specifications

Description	Order Number
Shandon Cytospin 4 Cytocentrifuge (Unit Only)	A78300002
Shandon EZ Funnel Starter Kit	A78710013
Includes 25 Shandon EZ Megafunnels", 20 Shandon EZ Singl	e White Cytofunnels".
20 EZ Double Cytofunnels, and Shandon Cyteslides**	
Shandon Clipped Funnel Storter Kit	3120110
Includes 25 Shandon EZ Megafunnels, 50 Shandon Single	White Cytolunnels*.
25 Double Cytofunnels, Shandon Cytoslides, and 12 Shando	on Cytoclios ^s

Dimensions (H x V	V x D)

Shandon Cytospin 4 Sealed Head

- One sealed head is included with the Cytospin 4, but many laboratories shorten preparation time by having a second sealed head ready for when the first finishes processing.
- · Autoclavable, 12-chamber head seals completely.

Description	Pkg/Qty	Order Number
Shandon Cytospin Sealed Head	Each	59910018

Thermo Scientific Shandon EZ Cytofunnel® Sample Chambers No more Clips!!

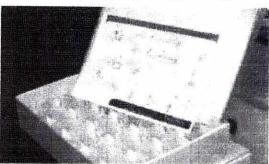

- Intended for single use with all Shandon Cytospin 2, 3, and 4 Cytocentrifuge applications.
- Simple and easy to use operational illustrations are included in the package.
- · Optimizes cell yield.
- Safe reduces the risk of exposure to pathogenic samples.
- Disposable eliminates time-consuming decontamination and cleaning.
- Decreases the possibility of crosscontamination.
- Eliminates the need for metal Shandon Cytoclips[®].
- · Closure caps provided with kit.
- Produces more cost-effective thin-layer preparations when compared to other thin-layer methods.

Shandon EZ Cytofunnel Bench Stand

Shandon EZ Megafunnel™

- Convenient for loading samples outside of the Shandon Cytospin 4 chamber.
- Stainless steel construction.
- Holds 12 Shandon EZ Cytofunnels, single or double.

Description	Pkg/Qty	Order Number
Shandon EZ Cytofonnel	Each	A78710022
Bench Stand		

- Designed for convenient preparation of larger volume samples.
- Shandon Cytofunnels designed for spinning large samples up to 6ml.
- · Minimizes the need to pre-centrifuge.
- Cell deposition area of 22 x 14.75mm (325mm²) for increased cell yield.
- Shandon Megafunnel Cytoslides® included.
- Can prepare both air-dried and fixed preparations, providing additional valuable diagnostic information.

Description	Pkg/Qty	Order Number
Shandon EZ Megafunnel	25 / Box	A78710001
With Caps And Slides		

Shandon EZ Single Cytofunnel with White Filter Cards

- · Disposable sample chambers with white filter cards.
- · Use for sample volumes up to 0.5ml.
- · Cell deposition area of 6mm in diameter (28 mm²).
- · Pre-attached white filter card for high absorbency.

Description	Pkg/Qty	Order Number

How the Cytofunnel Works

The Cytofunnel fits snugly against a specially marked Cytoslide and is held in place by a Shandon Cytoclip. Twelve Shandon Cytoclip assemblies fit into the Cytospin head.

After cytocentrifugation, the Shandon Cytoclip easily unlocks to dispose of the sample chamber and to remove the slide.

Disciplines That Use the Cytospin:

Cytology

- Still the gold standard for Non-Gynecological Cytology, especially hypocellular fluids.
- Many types of collection fluids and funnel options to choose from.
- Quality presentation at a fraction of the cost of other "thin-layer" technologies.
- · Prepares both "air-dried" and "fixed" specimens.

Microbiology

- Micro-organisms are often present in low numbers from limited sample volumes. Cytocentrifugation effectively spins the micro-organisms onto the slide, maximizing the yield and presenting those organisms in a clean, defined area, allowing for straightforward morphological identification.
- Only a small sample volume is needed so multiple samples may be run for a variety of special staining and support testing. It also concentrates samples for Gram stains.

Hematology/Oncology

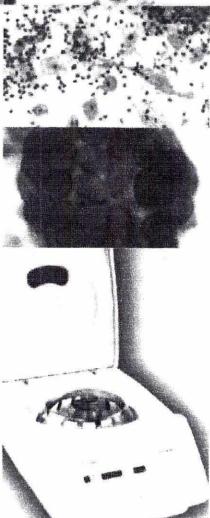

- · Easy to achieve a constant cell/unit volume.
- · Excellent for all fluids, bone marrow, and peripheral blood.
- Even with a cell count of "zero," the Cytospin often locates the few cells in the fluid that the counter missed.

Virology

 There are many published technical papers utilizing the Cytospin for the rapid detection of respiratory viruses, CMV Detection, ISH, FISH, etc.

Research/General Use

- The most cost-effective, time-effective way to make quality thin-layer cell presentations.
- · Excellent for molecular studies, specialized staining applications, and EM.
- · Used in veterinary, dental and chemosensitivity protocols.

Thermo Scientific Shandon Cytoslides®

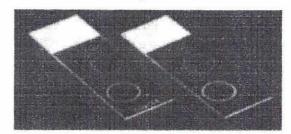

Cytoslides

- Specially marked slides for the Shandon Cytospin 4.
- Specimen area is outlined for rapid location during screening.
- All slides are 75 x 25mm, made from high-quality optical glass.

Coated Slides

- Eliminates the need for albumin coating procedures.
- · Saves labor and resource time.
- Eliminates background staining on albuminized, IHC or ISH processed slides.

Shandon Double Cytoslides

- Specially made for use with Shandon EZ Double Cytofunnel® Chambers.
- Each specimen is displayed onto the slide within a circle marked "1" or "2" which corresponds with the Shandon EZ Double Cytofunnel chamber.

Description	Pkg/Qty	Order Number
Shandon Cytoslide,	100/box	5991055
Double Circle, coated		
Shandon Cytoslide,	100/box	5991054
Double Circle non-coated		

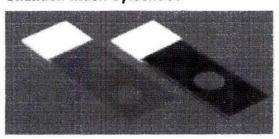

Shandon Single Cytoslides

- Specially made for use with Shandon EZ Single Cytofunnels.
- A white, 12mm diameter circle on the slide defines the area where cells will be displayed to allow for efficient and rapid location.
- · Uncoated slides available with circle on front or back.

Description	Pkg/Qty	Order Number
Shandon Cytoslide, Single Circle coated with circle on back	100/box	5991056
Shandon Cytostide, Single Circle non-coated with circle on back	100/box	5991051
Shandon Cytoslide, Single Circle non-coated with circle on front	100/box	5991059

Shandon Mask Cytoslides

- · Specially produced for immunofluorescence.
- Black-coating masks out UV light so that only the specimen within the circle can be viewed through a microscope.

Description	Pkg/Qty	Order Number
Shandon Cytoslide,	100/box	5991057
Single Circle, Black mask		
Shandon Cytoslide,	100/box	B5991050
Double Circle, Blue mask		

Thermo Scientific Shandon Cytology Collection Fluids

Shandon Cytospin® Collection Fluid

- Ready-to-use alcohol/CARBOWAX® (PEG) combination for direct specimen collection and fixation.
- Permits storage of specimens or unstained slides for weeks without adverse effect.
- Packaged in several forms, including convenient pump bottle and pre-filled specimen cups.

Description	Pkg/Qty Ord	ler Number
Shandon Cytospin Collection Fluid	3.8L x 1 (with pump)	6768001
Shandon Cytospin Collection Fluid	500ml x 2	6768315
Shandon Cytospin Collection Fluid	10L x 2	9990310
Shandon Cytospin Collection Fluid	120ml Cups, filled to 60ml, 125 / Cs.	9990323

Shandon Cell-Fixx™ Spray Fixative

- Spray fixative for convenient preparation of slides.
- Includes CARBOWAX which coats the smear to maintain cellular detail.
- Prevents air-drying artifact and cell loss.

CytoRich® Red Collection Fluid (Concentrated Formula)

- · Ready-to-use alcohol-based fluid.
- The easiest way to lyse RBC's and to solubilize proteins.
- · For a higher cell-yield and a cleaner background.
- · Compatible with immunohistochemistry.
- · Pre-filled containers available.

Description	Pkg/Qty Ord	er Number
CytoRich Red	3.8L x 1	B9990800
Collection Fluid		
CytoRich Red	500ml x 2	89990801
Collection Fluid		
CytoRich Red	20ml Cups, filled to 10ml, 180 / Cs.	89990802
Collection Fluid		
CytoRich Red	120ml Cups, filled to 60ml, 125 / Cs.	89990803
Collection Huid		

Shandon Mucolexx™

- · Ready-to-use mucoliquifying preservative.
- · Liquifies (with agitation) mucoid cytology specimens.
- · Maintains cellular detail.
- · Short term preservation of specimens.

Description	Pkg/Qty (Order Number
Shandon Mucolexx	3.8L x 1	9990371
Shandon Mucolexx	500ml x 4	9990370
Shandon Mucolexx	120ml Cups, filled to 60ml, 50 / Cs	9990375

Thermo Scientific Shandon Cytology Stains

Biological Stain Commission Certified Dyes.

Shandon EA-50

- · Polychromatic cytoplasmic stain.
- Clearly differentiates cellular components with pink, green, and blue-green hues.

Description	Pkg/Qty	Order Number
Shandon EA-50	4L x 1	6766002
Shandon EA-50	1l. x 2	6766001

Shandon EA-65

- Polychromatic cytoplasmic stain.
- Lower concentration of Light Green improves expression of eosin-stained components.
- · Ideal for thicker non-GYN preparations.

Description	Pkg/Qty	Order Number
Shandon EA-65	4L x 1	6766004
Shandon EA-65	1L x 2	6766003

Shandon Cytology Spatula

- · Economical.
- Designed with classic Ayre end and tapered tip.
- Made from smooth, select wood for good cell retention and release.

Description	Pkg/Qty	Order Number
Shandon Cytology Spatula	1000 (40 Bags x 25)	9990330

Shandon OG-6

· Demonstrates keratin in cytoplasm.

Description	Pkg/Qty	Order Number
Shandon OG-6	4Lx1	6766006
Shandon OG-6	1 L x 2	6766005

Shandon Kwik-Diff™ Stains*

- Fast 3-step differential stain for cytologic preparations, FNA's and microorganisms such as Helicobacter pylori.
- A quick alternative to traditional Wright's and Giemsa Staining procedures.
- · Kit Components: Reagent 1: Fixative

Reagent 2: Eosin

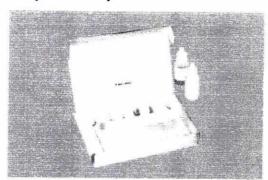

Reagent 3: Methylene Blue

· Available in kit form or as individual components.

Description	Pkg/Qty	Order Number
Shandon Kwik-Diff Stain Kit	500ml Reagent Size	9990700
Shandon Kwik-Diff Stain Kit	125ml Reagent Size	9990701
Shandon Kwik-Diff Reagent 1	41. x 1	9990705
Fixative		
Shandon Kwik-Diff Reagent 2	4L x 1	9990706
Easin		
Shandon Kwik-Diff Reagent 3	4L x 1	9990707
Methylene Blue		

"Sold only in the USA

- Facilitates processing of FNA's, tissue fragments and cell buttons quickly and reliably.
- Increases ability to process scanty or unseen material for cell block and reduces loss of critical material.
- · Suitable for immunohistochemical techniques.
- Replaces time-consuming and costly agar and thrombin techniques.
- Requires phosphate-free fixative on processor, such as Zinc Formal-Fixx*, Formal-Fixx*, or Glyo-Fixx* (formalin substitute) or simply bypass formalin fixation steps on processor. Cytoblock can also be run on a rapid biopsy program.

Description	Pkg/Oty Order	Number
Cytoblock Cell Block Preparation System	1 kit / 50 specimens	7401150
Replacement Reagents	11ml / Each	7401151

Thermo Scientific Shandon Octospot™

- Cytocentrifuge cells from 8-well microtiter strips directly onto a microscope slide (96 spots per spin).
 Turn 8 slides into 1.
- Incorporates an 8-well strip, an 8-well slide, a holding block and filter card assembled in a standard Cytoclip.
- Solvent-resistant slides retain separate reagents in individual wells to prevent cross-contamination.
